

Week 5 Written Assignment Title

James Ballou

Axia College of University of Phoenix

## Introduction

This assignment needs to have an introduction. In the introduction you should describe the key elements that you will be discussing in the body of the paper. You don't go you shouldn't go into detail about these subjects but you should give the reader an idea of what you are planning to introduce.

## Body

The body of the paper should contain various paragraphs that meet the requirements described in the grading rubric. It is important that you review the grading rubric to assure that you cover each element in detail. The amount of points that are associated with each element help you understand the level of importance that is connected with that and the amount of detail that you should include.

The paragraphs of the assignment body should be formatted in accordance with APA standards. You should have at least three sentences in each paragraph and no more than seven sentences. Properly formatted paragraphs help communicate to the reader that the document is professionally written and academically sound.

## Conclusion

This assignment needs to have a solid summary as well. The summary should underscore key points from the paper and help to remind the reader of any special issues that you discussed in the body. The summary is the single most under utilized segment of college papers and I believe this is caused by the fact that students don't know how to create an effective summary. I encourage you to review the tutorial that I have made available in the course materials area if you are unsure regarding your skills to create an effective summary. The tutorial that I created will help you structure your summary so that it is effective and complete.
